To determine the minimum versions of macOS and iOS that support passkeys and their synchronization, here are the key points from the provided sources:

macOS

- Passkey support on macOS starts from version 13 (Ventura) and later. This includes the ability to store, manage, and sync passkeys using iCloud Keychain.

iOS

- For iOS, passkey support begins with version 16 and later. Passkeys created on iOS 16 or later can be used on the same iPhone or iPad, as well as on other iPhones, iPads, and Macs using the same Apple ID, thanks to automatic syncing via iCloud Keychain.

Synchronization

- Both macOS 13+ and iOS 16+ support the synchronization of passkeys using iCloud Keychain. This means that passkeys created on one device can be automatically synced and used on other devices signed in with the same Apple ID.

In summary:

- **macOS**: Version 13 (Ventura) or later.

- **iOS**: Version 16 or later.

- **Syncing**: Supported via iCloud Keychain on both macOS 13+ and iOS 16+.
